sentation of this national wonder, covering a canyas some eight feet in length and four in width. The view s from the Canadian side, some distance above Table Rock, and takes in the entire sweep of the Horse-Shoe Fall to the corner of Goat Island, including also the Rapids, the "Three Sisters," and the Canada shore, until visual range is lost in distant white-caps, finally giving place to a smoother surface of water. The mighty torrent, as it leaps and foams, rushing onward, growing wilder and fiercer, until bending down and plunging over the awful cataract into a yawning abyss, seems as a reality. Here we behold this wild flood breaking into transparent foam, and then maintaining its more compact form in sluggish, deep, dark green, whilst from chasm far below rises a gauzy mist, which ascends and consolidates into beautiful clouds, fringed with purple nd golden tints from a setting sun. Arching all these is the solar bow with its exquisitely-delicate prismati-

other noted American picture, and we are confident that while the two are on exhibition here they will be visited by crowds. Every one who has any pretensions to artistic taste will go and see them.
